10000 Cranes Studio is a professional printing facility geared to producing masterful prints from original digital files or original works of art. We use high-quality, archival fine art papers and canvas with HD Ultrachrome® pigment inks. These materials have a wide color gamut and high Dmax (density) value ensuring correct color and tonal range. Our paper and ink combinations have been rated with Wilhelm Imaging® to withstand color fading and deterioration for 200+ years. (400 years on some media.) Our professional equipment is calibrated to assure consistent results. **We capture a digital file for you if need be, using a 102 megapixel Medium Format camera.** We've been working with artists and photographers in the Albuquerque and surrounding area for since 2002.

Pricing Schedule 12/23

PRODUCT	PRICE	COMMENT
Proofing Matte	7¢ per square inch	Hot Mold / 185 GSM / Cotton/ Alpha Cellulose Blend / 80 year rating - i.e. "Enhanced Matte"
Archival Matte	9¢ per square inch	Fine Art Archival / 310 GSM / 100+ year rating - Smooth or Textured.MUSEUM GRADE
Matte paper is the most common used paper in fine art printing. We purchase rolls of matte paper to offer competitive prices. Some roll papers will have a curl to them after printing and cutting. The curl will be eliminated when placing a heavy weight on them – We generally put your print in a bag with a backer board for many common size prints. This alone will remove the curl. We charge you our cost for bag and backer materials. – Some considerations for prints are listed below:		
8x10 prints FROM 17" ROLL	\$7.20 ea (minimum 2) (.09¢)	MUSEUM GRADE
8.5x11 SHEETS	\$14.00 EACH	MUSEUM GRADE
11x14 prints 24" ROLL	\$13.86 ea (minimum 2) (.09¢)	MUSEUM GRADE
Matte 13x19 prints SHEETS	\$28.00 each	MUSEUM GRADE

Submitting Files for Printing

Our facility uses the highest quality equipment to digitize artwork to create stunning fine art reproductions on paper or canvas. We photograph original artwork using a 102 MPX Medium format camera to insure that every brush stroke of oil, acrylic, watercolor delicate washes or all the details of pencil, charcoal and other media are brought front and center with gorgeous color matches. Sometimes it's difficult. Lighting plays a key role in assuring all of that detail is captured without specular highlights, glare, and other lighting issues that can contribute to a poor print.

In the event that you choose to photograph your own artwork that's totally fine. Just be aware that a poor quality file = a poor quality print.

File Submission

- Adobe RGB 1998 Color Space
- Tiff or Jpeg file format
- Submit file at the final size you want printed at 300 PPI.
- (For example: if you want an 8x10 print, then submit your file at 8x10 at 300 ppi. If you want a 24x30 print, then submit your file at 24x30 at 300 ppi.) If you have any problem with this concept, we can certainly help you with that. If your submitted file requires a few approved modifications, we are happy to make the necessary changes for a great print. If your submitted file requires a great deal of modifications we will need to discuss.
